## PROFILE SUMMARY

Frontend Web Developer with strong expertise in React.js, Next.js, JavaScript (ES6+), and modern responsive UI development. Experienced in building scalable, high-performance web applications using component-based architecture, server-side rendering (SSR), and static site generation (SSG). Proficient in state management with Zustand, API integration, performance optimization, and cross-browser compatibility. Passionate about writing clean, maintainable code and leveraging modern web technologies to deliver user-centric digital experiences.

## EDUCATION

HIGHER SECONDARY (CLASS 12) —  
PURSUING

BOARD: STATE BOARD

- Expected Completion: 2026

## WORK EXPERIENCE

- Project:** Wealth Info
- Company:** Balwant
- Nov-2025-present**
- Tech:** React

Frontend Developer (React)

- Tech Stack: React.js, JavaScript (ES6+), WebRTC, Socket.IO, Zustand, Tailwind CSS, DaisyUI, Axios, React Router DOM, React Hook Form, Yup, Framer Motion, Emoji Picker, Vite, Git
- Developed and maintained the Wealth Info web application using React.js and JavaScript (ES6+).
- Built reusable and modular UI components following component-based architecture.
- Implemented responsive user interfaces to ensure compatibility across multiple devices and screen sizes.
- Integrated RESTful APIs to fetch and display dynamic financial and user-related data.

## SKILLS

### FRONTEND DEVELOPMENT

- Next.js
- React.js
- Zustand
- JavaScript (ES6+)
- TypeScript
- SEO Optimization (Next.js)
- HTML5
- CSS3
- Tailwind CSS
- Responsive Web Design

### DEVELOPMENT TOOLS

- Git & GitHub
- npm / yarn
- Vite
- Webpack

## PROJECTS

### WhatsApp Clone (Real-Time Chat Application) | React.js

- Tech Stack: React.js, JavaScript (ES6+), WebRTC, Socket.IO, Zustand, Tailwind CSS, DaisyUI, Axios, React Router DOM, React Hook Form, Yup, Framer Motion, Emoji Picker, Vite, Git
- Developed a real-time chat and calling application using React.js, WebRTC, and Socket.IO, enabling peer-to-peer communication and live messaging.
- Implemented global state management with Zustand, responsive UI using Tailwind CSS, and enhanced user experience with animations and real-time updates.

### E-Commerce Web Application (Responsive) | Next.js

- Tech Stack: Next.js, React.js, JavaScript (ES6+), Zustand, Redux, Tailwind CSS, Stripe, Firebase, Axios, React Hook Form, Framer Motion, REST APIs, Git
- Built a fully responsive e-commerce application using Next.js and React.js with product listing, cart, and checkout features, using Zustand and Redux for state management.
- Integrated Stripe payments, Firebase authentication, REST APIs (Axios), and improved performance and SEO using SSR, Tailwind CSS, and Framer Motion.

## LANGUAGES

- English: Basics
- Hindi: Fluent

## PORTFOLIO

### Desktop / Computer Screen UI Design

- Designed a clean computer desktop UI that fits within a single screen viewport
- Created structured layout similar to a laptop home screen interface
- Used Next.js, React, Tailwind CSS, MUI, Framer Motion, Tippy.js, and Radix UI to build an animated and interactive web interface.
